ACADEMIC PROJECTS:

Main project:

- **Face Detection based attendance system:**

Front end : Python

Back end : MS SQL Server 2000.

Description : Our project propose a new way to mark the attendance of the students present in class by detecting the face of each student instead of marking by pen and paper. Each student’s facial information’s are stored at the student Registration time. Project uses python facial detection algorithms to save the facial data. Teacher can login the system and mark the attendance.
